Young Men's Board of Trade and Commerce Meets Tonight (Thurs.)

The organization meeting of the Young Men's Board of Trade and Commerce which was called for last week, was postponed on account of bad roads, and will be held in the Legion Hall this (Thursday) evening at 8:30.

Two guest speakers from the Young Men's Section of the Calgary Board of Trade will be present.

All young men of Didsbury and District between the ages of 18 and 40 who are interested in the welfare of the community are cordially invited to join the organization.

Anyone interested in the movement will be welcome to attend the meeting.

Girl Guide, Ranger and Brownie Corner.

The Brownies will hold a surprise hike tonight (Thursday).

The Girl Guides and Rangers will not meet for two weeks, on account of school examinations.

WEDDINGS

FORD—SMITH

A fashionable June wedding took place at the Evangelical Church on Tuesday afternoon, when Lucille Halvarda, eldest daughter of Mrs. Smith and the late Mr. George Smith, became the bride of Milton H. C. Ford, of Carstairs, son of Mrs. Ford and the late Mr. Henry Ford of Hanover, Ontario.

The church was decorated with ferns and lilacs, and the ceremony was performed by Rev. J. R. Geeson.

The bride, who was given in marriage by Mr. Frank Kaufman, was charmingly attired in a gown of white embroidered point d'esprit over white satin, with a full-length veil and orange blossoms, and wore elbow-length white lace mitts and carried a bouquet of Talisman roses.

She was attended by Miss Iva Rupp, who wore a dress of peach net over peach taffeta, with taffeta bolero and matching hat. Wearing elbow-length peach lace mitts, she carried a bouquet of Talisman carnations.

Little Shirley Ann Sutherland, dressed in pale green silk and matching bonnet, made a very pretty flower-girl.

The bridegroom was attended by his brother, Mr. Gordon Ford, and his brothers, Ed. and Ross Ford, acted as ushers.

Miss Dorothy Ranton, attired in pale green silk net over green silk taffeta, played the wedding music, and during the signing of the register Mr. Alex Robertson sang "Because."

After the ceremony a reception to 40 guests was held at the home of the bride's mother. Mrs. Smith received, wearing a dress of navy blue crepe with matching hat and accessories and wore a corsage of Talisman roses. She was assisted by Mrs. Wm. Sutherland, of Ponoka, sister of the bride, who wore a white knitted ensemble and white turban.

The room was decorated with spring flowers and the table was centred with a 3-tiered wedding cake flanked with tall ivory tapers and vases of lilacs.

Mrs. John Kinney, of Portland, Oregon, presided at the tea table, and Mrs. Ivan Weber cut the ices. Assisting in serving were Misses Dorothy Ranton, Alma Shaw and Lila Wrigglesworth.

The groom's gift to the bride was a navy leather handbag; to the bridesmaid a double clasp of brilliants; to the groomsmen and ushers gold tie clips, and to those serving, brilliant clasps.

After the reception the happy couple left for a honeymoon to the Okanagan Valley, B.C. The bride's travelling costume was a navy blue suit with matching hat and blue and white accessories.

Mr. and Mrs. Ford will reside at Carstairs.

EUBANK—BELLAMY

A quiet and informal wedding took place in Edmonton on the afternoon of June 1st, when Veronica Bellamy, daughter of Mrs. Moon and the late Mr. J. R. Moon of Anaheim, California, was united in marriage with Mr. John Arthur Eubank, son of Mr. and Mrs. J. Eubank of Didsbury.

The bride was smartly attired in a brown tailored suit with matching hat and accessories and wore a corsage of yellow Ophelia roses.

A reception was held at the home of Mrs. J. MacDonald, sister of the groom. Among those present were

New Highway May Touch Didsbury

As the result of a meeting on Monday evening with Hon. W. A. Fallow, minister of public works, Deputy Minister Monkman and Engineer McPherson, hopes have been raised that the new highway will be brought to the edge of Didsbury.

On Wednesday evening last, J. E. Gooder and M. Weber, the committee appointed by the Board of Trade, to present a petition of 960 names to Premier Aberhart, asking that the highway should be brought through town or to the edge of town.

They met the Premier on Thursday evening shortly after his return from Saskatchewan and were given a sympathetic hearing. They were promised that the matter would be reopened and an investigation made.

On Monday evening the minister of Public Works and his Deputy went over the ground here and Mr. Fallow told the committee that he would stop the purchase of land on the route two miles east of town and the engineers would be put to work to survey road along the east boundary of the town.

Knox United Church Notes.

The Anniversary services last Sunday were greatly enjoyed. Dr. Powell proved to be a great attraction and his sermons were very impressive and challenging.

On the Monday following, the supper and program were very well patronized. Dr. Paton gave a splendid lecture on "The Scottish War Memorial and Edinburgh." The proceeds were devoted to the Church Building Fund.

Next Sunday the services will be in charge of the pastor, and a cordial invitation is given to all.

D. Dippel & Sons report that they have sold their herd Yorkshire boar to A. D. Goodwin, of Ponoka. They have also sold 13 young males and two gilts to the Blind Man Valley Swine Club. The Dippel herd is accredited and of advanced registry. Many of their animals have been sold to improve the breed in different parts of the province.

Mr. and Mrs. J. MacDonald, Miss Elsie Roughly, Mr. and Mrs. Richard Horn, Miss Irene Bellamy, Mr. and Mrs. Harold Clemens, Mr. Ray Bellamy, and Mr. and Mrs. B. Robinson of Morrinville, Alberta.

Mr. and Mrs. Eubank will make their home in Edmonton.

'Hoppers Menace East Country

The grasshopper menace has been reported in the southeast portion of Mountain View Municipality and it will pay farmers to watch closely and be in a position to combat this pest wherever it appears.

Henry Hooper and Jim McCulloch were the first to report damage being done, but reports from other farmers have also been received.

The Rosebud Municipality has established a poison-bait mixing plant at Jim McCulloch's place, which will be in operation this week. Mountain View Municipality will make arrangements for its ratepayers to get their supplies from that point for the present, but will establish a mixing plant if the menace becomes more widespread.

For maximum results control should be got while the 'hoppers are in the crawling stage. The headlands where the 'hoppers hatch should be watched and bait should be scattered wherever damage is being done. This should be done when the ground temperature is between 65 and 95 degrees F., which is usually between 7 and 10 o'clock in the morning.

Bait should be damp when scattered, and 15 lbs. per acre or 15 to 20 flakes to the square foot, will give a maximum kill.

Anyone needing bait, which is supplied free, should get in touch with the municipal secretary.

Bolt Strikes School, Children Injured

Joann McBee, 12, was severely burned and Lea Nell McBee and Jean Burkholder badly shocked when lightning struck Big Prairie school, 25 miles west of Didsbury, at 2:30 Monday afternoon.

Lightning struck the school flag pole and started a fire on the roof of the school. Quick work of Percy Bouck and other nearby farmers extinguished the fire and saved the school, a heavy rain aiding greatly.

Dr. J. L. Clarke of Didsbury was called and found Joann McBee was unconscious and suffering severely, much of her clothing being burned. Dr. Clarke stated that the child was not in a serious condition.

W. I. Convention Here This Saturday.

The Didsbury W. I. Constituency Conference will be held at the United Church, Didsbury, on Saturday, June 18th. Delegates are expected from all the Women's Institutes in the constituency.

Mrs. Sibbald, of District No. 3, Morrin, Alta., will give an address. Mrs. N. Eckel is the convenor of the conference.

Miss H. Ray Showered.

Mrs. Hugh Morton entertained on Saturday afternoon last in honor of Miss Hazel Ray, bride-elect of the month, at a miscellaneous shower.

About forty friends gathered in the open under the shade of tall trees. Miss Ray took her place under an artificial arch of white and mauve streamers.

The guest of honor was recipient of many beautiful and useful gifts presented to her in two white and mauve baskets by four of her former school pupils.

A delicious lunch was served by the hostess and her assistants, following which the guests departed leaving their best wishes with the bride to be.

Gun Club Notes.

A. E. Turvey, representative of the Dominion Ammunition Co. and donor of the Turvey Trophy, paid the Gun Club a courtesy call and took part in the shoot on Monday evening.

There was a good turn out of both shooters and spectators at the shoot held on Monday evening. Following were the scores.

A. E. Turvey	46 out of 60
J. Caithness	19 " 25
Ed Watkin	19 " 25
I. L. Klein	17 " 25

R. Ady	15 " 25
Ken McCoy	13 " 25
Fred Aastrup	9 " 15

Lone Pine Baseball News

In the second league fixture, Lone Pine received a decided setback from the Olds team. The locals met disaster in the first inning, when Olds capitalized on a flock of errors. A continuous stream of errors gave Olds an easy victory and at the end of the scramble they emerged with a 15 to 3 triumph. This defeat is the first for the locals this year and it was quite evident that they were badly off color.

Lineups

Olds: A. Black, Hube Gooder, B. Black, C. Sorenson, C. Gebert, W. Allen, F. Warshowski, Bill Gault, Ausmos and Usselman.
Lone Pine: Otto Faas, D. Frizzell, J. Clarke, C. Frizzell, D. Jenkins, I. Jenkins, R. Lyons, F. Evans, G. and H. Campbell.

The following are the remaining games of the first schedule:

Torrington at Olds, June 14
Lone Pine at Bowden, June 16
Olds at Torrington, June 19
Bowden at Lone Pine, June 19
Bowden at Olds, June 21
Lone Pine at Torrington, June 21
Torrington at Bowden, June 24
Lone Pine at Olds, June 24

Postponed games to be played under mutual arrangement before close of the schedule on June 24th

Turgeon Grain Commission Report

The recent publication of the findings and recommendations of the Turgeon Royal Grain Commission does not seem to have caused a ripple of any sizeable proportions on the body politic to date.

This apparent lack of public interest of a vocal nature may be due to the fact that the document in its entirety, a tome of considerable dimensions, has not yet been printed and distributed and even the ample summaries issued to the press are of sufficient proportions to necessitate considerable cogitation before their contents become assimilable.

On the other hand, the absence of public comment on wide scale might be credited to lack of any spectacular proposals in the recommendations which, generally speaking, follow along lines regarded in some quarters as "safe and sane".

Some Disappointment Possible

Undoubtedly a substantial section of the farming community in Western Canada is disappointed to find that the Commission does not recommend the establishment of a national compulsory grain marketing board with full-fledged powers, for which there has been, and still is, a considerable demand from some individual farmers as well as farmer organizations.

Mr. Justice Turgeon's verdict that a national compulsory marketing organization would be impractical is somewhat modified, however, in his further suggestion that the present Canada Wheat Board set-up should be maintained "because of uncertain world factors."

To what extent the disappointment caused by the absence of a recommendation for a national compulsory marketing organization will be tempered when Mr. Justice Turgeon's reasons are thoroughly digested, remains to be seen. The general Western attitude towards the decision to reject such a proposal on the grounds of expediency, both abroad and at home, will probably not crystallize until farmer leaders have made public their views on the report and this is not likely to be forthcoming until they have had an opportunity of perusing the complete document.

Whether or not the reasons advanced in the report for refraining from recommending a compulsory board are sufficiently cogent to persuade leaders of farmer organizations that the time is not yet ripe for a such a board, it is a safe venture that the demand for it will be renewed at some future date, and particularly if a series of bumper crops in producing countries result again in low prices and another big carryover.

Trend Revealed At Conference

The very fact that some measure of control over production in the large producing countries, because of the danger of a recurrence of a flooded export market under certain conditions, is being urged by delegates who attended the British Empire Producers' conference this spring in Australia, would indicate that the agitation for compulsory control measures in some form will not be abandoned altogether.

This viewpoint can be elicited from the statement of one of the delegates recently returned from the Empire Producers' conference, J. H. West, president of the Saskatchewan Wheat Pool and chairman of the Pools' Central Selling Agency, who at a recent meeting in Regina forecast the ultimate necessity of a world wide agreement among all wheat producing countries to eliminate dumping and surpluses "that shatter prices and bring ruin to producers."

Whether or not farmers and farm organizations continue their efforts towards the establishment of a national compulsory marketing organization, defer such efforts, or drop them entirely, serious consideration should be given in the meantime to some useful recommendations in the Turgeon Commission report.

Some Valuable Suggestions

Chief among these suggestions are recommendations for continuance and extension of voluntary co-operative marketing schemes "after the pattern of the Australian pools"; the establishment in London, England, of a Canadian representative to investigate buyers' complaints and endeavor to ensure consumer good will; periodic visits by members of the Board of Grain Commissioners to Great Britain and the establishment of a Canadian Wheat Institute to conduct research into new markets and new uses for wheat.

The necessity for the last-mentioned has on previous occasions been urged in this column on the ground that the processing of wheat into by-products may have great possibilities in widening the market for what is still the chief product of Western Canadian agriculture, and too much stress cannot be laid on the advisability of endeavoring to open up new markets of this type.

If some of the wheat now grown for bread can be diverted into commodities of another form, to the extent that this is possible and the product can be made a commercial feasibility, the dire consequences of another glut can be lessened by that much; and if such by-products can be absorbed in the domestic market, they may open the road to the development of new Canadian industries, a possibility which should not be overlooked.

Proving By The Stars

According To American Professor Signs Are Not Infallible

Astrologists claim that mysterious vibrations from distant stars influence human characteristics and abilities. Like every other scientist in good academic standing, Psychologist Paul Randolph Farnsworth, of Stanford University, views this claim with extreme skepticism. Last week he reported a statistical check of the horoscope makers on one specific point.

In five out of six "standard" astrology books that Dr. Farnsworth examined, it appeared that a person born under Libra ("The Scales"), seventh of the zodiac's 12 signs, should have musical ability. Libra's children are those born from September 24 to October 23. Looking up the birth dates of 1,498 musicians, Dr. Farnsworth found that fewer were born under this sign than under any other except Scorpio. Libra and Scorpio were in fact tied for last place as musician-makers. Thus in picking a musical sign the astrologists could have made 10 better choices than Libra, and could not have made a worse.

Dr. Farnsworth himself plays the violin very ably. He was born on August 15, under the sign of Leo. Time.

The call notes of the cassowary can be heard two miles.

Thousand Islands Bridge

Dedication Ceremonies To Be Held On August 18th

Prime Minister Mackenzie King of Canada has accepted the Thousand Islands bridge authority's invitation to attend the dedication ceremonies opening the new Thousand Islands international bridge on August 18.

The invitation to Mr. King corresponds to the one recently made to President Roosevelt, a warm personal friend of the Canadian premier, by the members of the bridge authority. Similar invitations have been extended to Lord Tweedsmuir, Governor-General of Canada, and to Governor Herbert H. Lehman of New York. The new Thousand Islands international bridge across the St. Lawrence river and the Thousand Islands, will connect Ivy Lea, Ont., near Brockville, with Collins Landing, N.Y. It consists of five spans and 8½ miles of approaches and connecting roadways.

Keyholes had been placed below doorknobs for more than a century before a hotel genius thought of placing them above the doorknobs, where the patrons could readily see them.

Colonel Charles A. Lindbergh has travelled more than 500,000 miles by air since he first learned to fly.

Elephants have skins that in places are four inches thick.

You'll never really know the thrill of "rolling" your own until you do an Ogden's roll. Yes, sir, you can "bank" on Ogden's with safety. It's got perfect taste appeal—it's cooler, milder, more fragrant every time. Pilot yourself to pleasure! Try an Ogden's roll and don't forget to use the best papers—like "Vogue" or "Chantecler."

The Old Barn Dance

It Was A Community Event In Which All Took Part

In pioneer times, when barn raisings were frequent, barn dances were community events. It was a poor barn indeed that was not opened by a jolly "house-warming". In those days, there was none of the new-fangled fox-trots, "toddle", Charleston or the even newer Black Bottom or Big Apple. There was the occasional dignified waltz but generally speaking it was "Salute your partners and all grand chain," with the booming voice of the caller keeping time to the music as he sang out "and wink your eye as you pass her by, and kiss the next one on the sly."

It is easy for the older folks to warn the youth of to-day about keeping late hours. It would not be so easy for them to explain, however, what kept them stepping it off until daybreak at a rural barn dance!

And the curious part of it was that in those days it was the middle-aged and more elderly people who insisted on the fiddlers keeping up the music until it was time to go home and feed the cows.—Windsor Star.

New Idea In Offices

Czechoslovakian Shoe King Does His Business In Elevator

Mr. Bata, the shoe king of Czechoslovakia, is building a new factory 16 stories high, which is going to be the biggest concrete structure in Europe. Mr. Bata's own office in this factory is going to establish some record too, in Europe and out of it. It is a big elevator which moves up and down a shaft adjoining the offices of the department heads on each floor, so that when Mr. Bata wants to have a conference all he does is push a button and presto, the conference is on. We hope this new development in office construction stays in Czechoslovakia.—Tide.

SELECTED RECIPES

PRUNE WHIP

1 package Orange Jell-O
1 pint hot water
1½ teaspoon salt
1½ teaspoon grated orange rind
4 tablespoons sugar
1½ cups cooked prune pulp
Dissolve Jell-O in hot water. Add salt and orange rind. Chill until cold and syrupy. Place in bowl of cracked ice or ice water and whip with rotary egg beater until fluffy and thick like whipped cream. Add sugar to prune pulp and fold into whipped Jell-O. Pile lightly in sherbet glasses. Chill until firm. Top with whipped cream or custard sauce. Serves 10.

When we were about to marry we said we'd be the boss or know the reason why. We know the reason why.

Nearly 50 totally or partially blind persons in the United States are engaged in writing as a means of livelihood.

It's against the rules for any big league baseball player to be without a cap while in the game.

Canada As A Nation

Unity Must Be Maintained Or Full Growth Not Possible

In Nova Scotia recently the Legislature considered setting up a statute to Sir Charles Tupper. It was of Tupper that Sir Wilfrid Laurier said that he made Confederation possible.

One of the Maritime legislators objected to the statue on he deplorably narrow ground that Tupper had done more for Upper Canada than for his own province. It is not such shortsighted gentlemen, unable to peer beyond the boundaries of their own province, who will build Canada into the nation she is to be.

In burning contrast were the words of the Right Hon. R. B. Bennett when he addressed the Young Men's Section of the Toronto Board of Trade a few days later:

"Ontario is a great Province, but it isn't Canada," he urged with passionate emphasis. "Neither is Quebec, the Maritime Provinces nor the Far West. And unless we realize that narrow provincial boundaries are not the limits of nationhood, we will never become the Dominion we ought to be. We must have common faith, common sacrifice, yes, a common confidence in each other to reach our common goal."

"On the shoulder straps of those who died for this country you will find only one word and that word is 'Canada!' Can we think nationally as they did? If we do not, we have failed." —Brockville Recorder and Times.

An All-Canadian Foot Remedy Company

We hear so much of American business successes that it's a pleasure to tell of Cress Laboratories in Kitchener, Ontario, who in seven short years have their now famous foot remedies in thousands of drug and general stores across the Dominion.

In an interview with Hy. J. Heldman, manager, he pointed out that only recommendations from users could account for the steadily increasing sales. He also said that Mr. Cress himself had been selling Cress Corn Salve since 1921, but that with the formation of the Cress Laboratories in 1931 a full line of tested foot remedies had been added—so simple and sure in application that every user would be sure of satisfaction.

Judge Has Good Idea

Speeders Are Fined Dollar A Mile In Buffalo

A dollar a mile will wipe off the smile of the driver who thinks he's a honey. A dollar a mile may not be a pile but at 75 it's real money. The Buffalo court judge who fined a young man \$75 for courting about the city streets of South Buffalo at 75 miles an hour has a good idea. It helps to swell the city treasury and may serve as a governor on the ears of speed monkeys. Any boy or man who drives in city streets at high speed is playing with life and death. —Buffalo Courier-Express.

Just because a man's clothes look as if they'd been slept in doesn't prove conclusively that he has been to church. He may have been out fishin'.

Where The Fault Lies

Telephone Operator Says Many People Do Not Speak Clearly

If you have trouble making yourself understand over the telephone, do you think the listener stupid or the apparatus out of order, or are you willing to admit that you yourself are at fault? Perhaps you are one of those who agree that the American telephone public has the mumbles and that the mumbles are fast degenerating into the grunts. To say a telephone operator, Miss Katherine Schmitt, who speaks from experience, for she got her first job in Manhattan's Nassau street exchange in 1882 and worked at the board for nearly 50 years in positions of increasing responsibility.

During the last eight years Miss Schmitt officially has been in retirement, but she is called upon now and then for the advice that she is especially equipped to give and her observations deserve a wide audience.

The human voice, she says, is capable of being trained to a high degree, but it does not take extraordinary training to produce clear, understandable telephone speech. What really is needed is for the speaker simply to give thought to the possibility that he is a mumbler, and to utter the syllables slowly and distinctly, without yelling or without skipping all the consonants. Thus we can do our share in fostering one of the amenities of life.—Buffalo Courier-Express.

Taking Exciting Trip

California Heiress Is Planning Sixth Expedition To North

Summertime to Louise A. Boyd means hardship and exciting adventure in the Arctic. San Francisco and San Rafael heiress, she soon leaves Norway, where she has chartered an old Norwegian seal ship, on her sixth expedition to the North.

She plans to work her way from Spitzbergen to Greenland at a higher latitude than any vessel has made the passage. Four scientists will make the trip with her. The vessel carries a crew of 14.

Miss Boyd already has penetrated farther north than any white woman and is the only foreign woman to receive the order of Saint Olaf from Norway. That was awarded for her help in the search for Amundsen in 1928. At the same time the French government made her a chevalier of the Legion of Honor.

India greatly increased its business with the outside world last year.

No More Zeppelin Flights Without Use Of Helium Says Dr. Hugo Eckener

Dr. Hugo Eckener holds little hope for the future of Germany's lighter-than-air passenger travel, in view of the apparent failure to obtain helium from the United States.

"There will be no more passenger Zeppelin flights without helium," the veteran president of the Zeppelin manufacturing plant said in an interview at Washington.

He explained he felt "disappointed and astonished" by the continued refusal of Interior Secretary Ickes to consent to sale of the non-inflammable gas.

"It is sad," he said, "that we are held up by the military opinion of one Cabinet officer, when the United States military authorities have indicated they fear no military developments from the sale."

Ickes is a member of the board of six Cabinet officers who must agree to the sale of any helium to foreign powers. The United States has a natural monopoly of gas. Eckener said the decision might be "the death stroke" to the experiment in lighter-than-air transportation. He insisted that Germany would derive "no military use whatsoever" from helium.

The father of trans-Atlantic dirigible travel said he expected to continue Zeppelin developments at least another year. "Maybe something will change by then," he added.

The demand for helium to inflate the giant airships was spurred by the explosion at Lakehurst, N.J., last year of the Zeppelin Hindenburg, in which 36 persons were killed.

The Hindenburg was built in Germany to replace the Graf Zeppelin, which, using inflammable hydrogen, had made 80 round trips across the Atlantic. The Graf Zeppelin has discontinued passenger flights.

President Roosevelt meanwhile kept a hands-off attitude. White House aids said he was powerless to interfere under the law passed last September.

Niagara Falls Changing Shape

Erosion Said To Be Progressing At A Rapid Rate

Officials reported that Niagara Falls once more changed its shape slightly during the past winter, and the United States falls is taking on a horseshoe shape similar to that of the famous Canadian Horseshoe Falls.

The city publicity department announced that a survey had revealed that the crest of the United States falls had developed a more decided saw-tooth appearance than in former years. Two V-shaped indentations have appeared in the crest, each about 20 to 30 feet deep.

"It is clearly evident that erosion is progressing at a rapid rate and that the heretofore fairly even and straight American falls is taking on a horse-shoe shape, similar to that on the Canadian side of the river," the bureau reported.

Milady's Fur Coat

Furs Manufactured In Canada For Home Use

Dressed and dyed, or undyed, skins of furbearing animals are fashioned into wearing apparel of various kinds by the fur goods industry of Canada. Coats, capes, scarves, collars, cuffs and muffs are some of the items manufactured but the principal of all is the fur coat. According to statistics now made available, the fur coats made in Canada for women in 1936 totalled 90,602. This is the largest number ever recorded by the industry. Practically the whole demand for fur goods in Canada is met by the home industry, and likewise nearly all of the goods manufactured in the Dominion are made for home use, the import and export trades in manufactured fur goods being of relatively small importance.

Old Ship Still Running

One of the oldest ships in the world, the Edina, has observed its 83rd birthday anniversary in Melbourne, Australia, and will continue to make regular trips in Port Philip Bay as usual. It was built as a troopship for the Crimean war and is still good for a speed of eleven knots.

Anxious To Co-operate

Aviators Will Avoid Fur Farms If Location Is Known

Complaints from several mink and fox farmers in Edmonton district against low-flying aeroplanes which frighten the animals, sometimes causing them to eat their young, brought from T. G. Stephens, civil aviation inspector, a reminder that air regulations provide for protection of mink and fox farms.

"Civil aviation regulations suggest that mink and fox farmers paint their watch towers chrome yellow and black and that in addition a red flag should be flown from a low mast on the tower to aid pilots to identify the farm. Where there are no watch towers, erection of pylons at least 20 feet high, painted in those colors, is suggested.

"If breeders notify us that they are marking their farms this way and give us the location of their farms, all pilots and operating companies throughout Canada would be notified and warned to avoid the location as far as possible," he said.

In 1930 a circular was issued by the Department of National Defence following a parley with the Canadian Nation Silver Fox Breeders' Association outlining the recommendations. Mr. Stephens said. It also was suggested then that farms located on air mail routes might display on the watch tower a red light "of sufficient candlepower and intensity to be seen at three miles under conditions of fair visibility."

Operating Hotel In India

Is Some Job Because Castes Make Servant Problem Difficult

"Operating a hotel in India is a crazy business, but we get used to it," remarked R. E. Hotz, director of the Hotz Trust Hotels of Delhi, Agra and Sumba, who visited Toronto with 55 hotelmen and caterers from other countries.

Mr. Hotz described the servant problem in his hotels as "a headache." He said that his hotel in Delhi had 98 rooms and needed 140 servants to keep it tidy. "If we asked a Moslem servant to sweep a room he'd be insulted. That is a job for the lowest caste natives who are hired to do nothing but sweep and scrub. The Moslems act as water boys and will do nothing but take care of baths and wash bowls."

Tales of the fabulously rich Indian princes were not fairy stories, Mr. Hotz said. When they stayed at a hotel they brought their own chef and staff of servants. "If they come for hunting, and the best shooting is to be found 15 miles away, they would think nothing of constructing a macadamized road to the scene so their guests could get their tiger."

Useful Data

Question Aimed To Put Right Man In The Right Job

Sixty questions aimed to put the right man in the right job have been prepared by the National Institute of Industrial Psychology.

It has sent out a questionnaire from which it hopes to derive useful data for vocational guidance purposes. It wants to find out how persons doing the same jobs resemble one another and how they differ from people doing different jobs.

Here are some of the questions requiring a "yes" or "no" answer: Are you certain that the sun goes round the earth?

A woman's place is in the home? Sincere prayers are always answered?

Maybe you are positive man possesses an immortal soul? Seeing is believing?

Do you think it false to say that a fully grown thrush is usually larger than a sparrow?

Art is more vital to life than science?

The planet Neptune never is visible to the naked eye, but can be seen with a small telescope.

Young icebergs are called calves; they are the offspring of the parent glacier

Publishers Bothered With Requests For Free Publicity

Never before has there been such a demand on Canadian newspapers for free publicity in connection with matters that have no possible claim for consideration on behalf of the publishers.

Nearly every paper is ready and willing to give its space to worthy enterprise when the making of money is not the object aimed at. Where money is to be made there is no good reason why advertising expenses should not be counted in the same as any other expense in connection with the undertaking.

Of late years producers of almost every imaginable commodity have commenced a regular campaign by which they hope to gain the insertion of their publicity free of charge on the plea that it contains a "certain amount of news value."

Municipalities are going into the same business, several of them dunning a news bureau in connection with their publicity department, and sending out dispatches of only the most meagre general interest, with the idea of keeping the place before the public eye.

The Dominion and Provincial governments are also taking a hand at the business. They send out reams of publicity matter with requests for insertion, much of which is of a statistical nature and of interest to comparatively few citizens.

There is a tremendous amount of brain energy, cash and postage dropping into the wastepaper baskets of Canada on this account. If this amount were properly directed into the channels of legitimate, paid-for advertising, those behind the scheme would have every reason to expect results.—The Chatham News.

Would Be More Effective

If Drunken Drivers Were Deprived Of Car For Long Period

The opinion that something more could be done to correct the situation relative to drunk driving and highway accidents than the branding of a large portion of the population with jail sentences finds a subscriber in W. F. Nickle, former Attorney-General of Ontario, who suggests that it would be more effective to confiscate the car. He says that in some cases men take the jail sentences as nothing more than a joke. In Sweden the problem is dealt with by taking the cars from drunken drivers for long periods and Mr. Nickle thinks that would be the most effective procedure here. He says he has been doing a lot of reading and studying of the question.—Port Arthur News-Chronicle.

Bags Mountain Lions

Martin Morigeau, resident of the Kootenay Indian reserve, may consider he saved the lives of 800 deer last winter. He brought in the pelts of 16 cougars, considered a record catch for one season. The government pays a \$20 bounty for every cougar which is estimated to kill annually 50 deer.

Care Should Be Taken To Secure Pure Ice Supplies With Coming Of Summer

Go Back For Centuries

Tree Peonies Were Grown By Chinese Emperor In Year 606

Gardeners may not take time to ponder that in buying a plant and bringing it into flower they may be unfolding some of the romance of civilization, of far countries and of precious things lovely to behold. Yet they would find all these exemplified in the tree peony.

The single specimen in one's garden may be of the same variety that blossomed for Emperor Yang, who ruled China from 606 to 616. Incredible perhaps, but some thirty named varieties were known during this period. It was more than a thousand years later that Robert Fortune brought the first plants back to England.

In one of the earliest American garden magazines a hundred years ago frequent references were made to the tree peony. It was well known but herbaceous peonies succeeded in crowding the tree peony from general popularity. However, one of the oldest American nurseries, long noted for its collection of tree peonies, offers a varied list this year as hitherto.

The Chinese are said to have called the tree, or Moutan, peony "The King of Flowers," and the herbaceous peonies "The King's Ministers." The tree peony actually is a small shrub growing about five feet high, although its has been reported to grow as tall as ten feet in China. The woody-stemmed plants are well branched, spreading out broadly; a soft effect is contributed by the leaves, which are finely cut and a dull green.

Saves Him Trouble

Dealer In Celery Only Never Changes The Price

Celery shoppers at 181st street and St. Nicholas avenue, New York, have to accustom themselves to the quirks of the city's only retail celery specialist. He runs a one-article, one-price store. It's a tiny store. It could use a spread newspaper for a roof. The article is celery only and the price always is 15 cents a bunch. When the market price goes down, you get more celery for your money, and when it goes up you get less. The fixed price saves him the trouble of adding up bills and making mistakes in giving change. His customers, he explains, are used to it by now. "If they haven't learned in 17 years," he says vehemently, "they needn't buy here no more, that's all."

Although many tricks of magic take only two minutes to perform, they have cost their originators several hundreds of dollars in material and years of effort to perfect.

(By John W. S. McCullough)

M.D., D.P.H.

With the coming of warm weather the problem of ice supplies becomes one for the housewife. Certain germs of disease, such as those of typhoid fever, are not killed by freezing. As water crystallizes it extrudes suspended matter and even dissolved substances. Perhaps about 90% of all bacteria are squeezed out during the purifying process of freezing. It is the hardest ones which survive.

The moral of this is that water used for natural ice supplies should be of good sanitary quality and that the ice harvested should be handled in a cleanly manner. Under natural conditions the surface layer of ice in ponds contains most of the impurities and the lower layers are relatively purer, for the reason that ice grows from above downward and the freezing of the water forces out both suspended and dissolved matters. It is therefore, good practice to plane the surface of the ice.

Manufactured ice is safer than natural ice providing the source of supply of the water used in the process is above suspicion. This type of ice is now universally made by the ammonia process. The principle is that condensed ammonia in expanding requires heat which is taken from surrounding objects and in this way the water is frozen. There are two processes; the one known as "can ice" and the other as "plate ice". In the first, the freezing takes place in rectangular cans; the water freezes from the sides of the can toward the centre and the impurities are extruded and concentrated in the core. In well-equipped plants this core is removed by suction apparatus before it freezes, and clean water substituted. In making can ice the water must first be distilled or boiled in order to drive out the air, else the resulting product will be bubbly. Plate ice is made by freezing water in large shallow tanks. The water freezes upon the surface and when of sufficient thickness is cut out and removed in blocks. In this process it is not necessary to distil or boil the water since the air is forced out naturally in the process of freezing.

The men who work "on ice" should have clean shoes otherwise considerable amounts of filth may be transferred to the cans, the ice field and ice tanks. Pollution from every source should be guarded against. If then, ice supplies are taken from clean sources, or manufactured from clean water with precautions against its being fouled by the handlers, the dangers from this article are relatively small.

Queer Town In Belgium

Gets Its Principal Source Of Income From Insane

In Ghent, Belgium, one person in five is said to be mad. The insane are everywhere. You meet them in the street, in the tram, in the public houses. But they are not ostracized or regarded as in any way strange. This is not surprising because the town gets its principal source of income from them. Madmen come from all over the world to live in Ghent and the insane of Belgium nationality who are too poor to keep themselves are supported by the state. There is scarcely a family that does not have a madman boarding and rooming with it. The lives of the insane are regulated and controlled by the municipal authorities yet there is surprising freedom and lack of restraint. Once in a while, perhaps, Napoleon may meet Wellington, but even such an awkward situation as that is easily and peacefully settled over a glass of wine.—Detroit News.

Excursion To Churchill

The sixth annual excursion to Canada's youngest port on Hudson Bay will leave Winnipeg, on August 12 for Churchill, the most northerly point reached by rail in Canada and terminus of the Hudson Bay railway, according to R. Creelman, passenger traffic manager of the Canadian National Railways.

St. Francis of Assisi would not touch lamps or candles; he believed that his hands defiled them.

This Hanging Is Fascinating To Do

Household Arts by Alice Brooks

You Need Not Frame This Panel

PATTERN 6129

Cute kittens in single stitch—lilies in lazy-daisy stitch and French knots make a delightful panel done in silk, wool or cotton floss. Pattern 6129 contains a transfer pattern of a panel 15 x 20 inches; color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The World of Wheat

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

"Undoubtedly the Western producer works under a disadvantage in Canada's fiscal policy. — The custom laws of other countries, including Canada, played some part in the adoption of policies that led to a shrinkage of wheat imports into the following countries: Switzerland, Italy, Belgium, Holland and in a less degree Germany and France."

These are the significant and important words used by Justice Turgeon in the Royal Grain Inquiry Commission Report just issued.

The Hon. Mr. W. D. Euler, Minister of the Department of Trade and Commerce, has recently reminded us that "Practically every person in Canada is affected by the trend of Canada's trade. — Our problem is to find markets for our surplus production. On our success in doing so depends the livelihood of one half or more of our population."

Not only do high tariffs lose markets for our wheat, as Justice Turgeon reports, but in addition they increase the cost of all living things that prairie farmers have to buy for living and production.

The lowering of high tariffs and the removal of other restrictions against international trade would, therefore, considerably benefit our prairie farmers. Such action in addition would bring about increased world prosperity, and would remove a serious cause of war.

Following factors have tended to raise price: Frost and rust attack U.S. winter wheat -- Argentine corn crop officially reported poor; some green or rotted -- Greece buying security wheat reserves -- France authorizes additional durum importations -- Yugoslavia sanctions importations of 400,000 bushels of wheat -- Black sea shipments continue very small.

Following factors have tended to lower price: U.S. private estimates predict record wheat crop -- Good reports of Argentine wheat seeding -- Prairie crop conditions almost normal -- U.S. orange exports set record for winter season -- European crop prospects improve -- Czechoslovakia negotiating for purchase of Polish rye on barter basis

Wheat Pool Makes Payment In Advance

Announcement was made from the Alberta Wheat Pool head office last week that the annual payment of principle and interest, due on September 1st, 1938, on the bonds issued by the province of Alberta to offset the 1929 overpayment, had been made three months in advance. The amount totalled \$453,250.

The Alberta government holds Alberta Wheat Pool bonds on account of its having guaranteed the banks in respect to the 1929 overpayment. Since the debt was incurred the Alberta Wheat Pool has met every payment of principal and interest punctually.

Burnside Notes

Miss S. Zook has gone to Condor, Alberta, to be soloist at a series of evangelical services.

Mrs. N. Eckel and Robert and Mrs. B. Woods spent Saturday in the Big Prairie district west of Cremona.

Mrs. Geo. Hergert, of Calgary, is visiting her son, Mr. Otto Bittner and other relatives.

Mr. and Mrs. E. Stiles and son, and Mrs. Eckel and Robert were Sunday supper guests with Mr. H. McLean and Mr. and Mrs. Fred Fritz.

Celebrating her daughter's second birthday, Mrs. Otto Bittner entertained at a turkey dinner on Wednesday of last week. The guests were Mr. and Mrs. Chris Khret, Esther and Elmer, Mrs. Borthwick and Mr. Fred Evans.

Mr. George Metz and son Fred, spent the early part of the week at Banff. They were accompanied by the former's nieces, Miss Mabel Metz, of Almira, Ont., and Mrs. Walter Mauer, of Waterloo, Ont., who have been visiting here.

Lone Pine W.I. met at the home of Misses Mina and Hazel Viney on Thursday last. Mrs. W. Lyons gave a splendid paper on "Child Welfare and Public Health." Mrs. H. Richardson, sen., was appointed to attend the farm women's week at Olds. The draw was won by Mrs. Clare Heron.

The July meeting will be held on Wednesday, July 5th, at the home of Mr. J. Garner with Mrs. Floyd Ahlgrim assisting.

Melvin Notes.

Melvin and Cremona ball teams played an exhibition game at Cremona on Friday, Cremona winning by a score of 52. In a league game at Crossfield, Sunday, Melvin came out on top by a score of 54.

Next Sunday league game will be between Melvin and Dog Pound at the latter's ground. See poster for time of game.

Mr. and Mrs. Henry Cowitz, of Sweethome, Ore., are visiting with the latter's brother Mr. Al Cowitz and family and other relatives.

Mrs. Otto Krebs entertained on Wednesday afternoon in honor of Mr. and Mrs. Henry Cowitz, also Mr. and Mrs. W. Allen, of Edmonton, who are spending their holiday here.

Mr. G. Carlson is visiting with her daughter, Mrs. P. Daniels at Calgary.

Mrs. Jim Adam and Janet, were Sunday guests with Mrs. Charles Youngs.

Don't forget the Canadian Legion dance at the Hall this Friday, June 17th. Al. Mack's Calgary orchestra.

A number from the district attended the lovely shower given by Mrs. Hugh Morton on Saturday in of Miss Hazel Ray.

Screen Star Travels Canadian Way

Louise Fazenda, of movie fame, and her husband, Hal Wallis, official of Warner Brothers, are seen here on the Canadian Pacific liner "Empress of Canada" just before sailing to Honolulu for a holiday. They were accompanied by their five-year-old son, Hal Junior, who has never yet faced a camera, either professional or amateur.

NOTICE TO CREDITORS AND CLAIMANTS

In the matter of the Estate of Marie Mueller, late of Didsbury, in the Province of Alberta, widow, deceased.

Notice is hereby given that all persons having claims on the estate of the above-named Marie Mueller, who died on or about the 23rd day of January, A.D. 1929, are required to file with the undersigned, solicitor for the executors, by the 18th day of July, 1938, a full statement duly verified, of their claims and any securities held by them, and that after that date the executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 31st day of May, 1938.

W. A. AUSTIN,
Didsbury, Alberta.
Solicitor for Robert and Otto Mueller, the Executors.

"MEN AT WORK!"*The most cheerful sign on the road*

★ ★

"MEN AT WORK" is an encouraging, cheerful sign upon the highway.

It is the happiest sign on the business highway too. Business enterprise, making wise use of banking service, is the mainspring of employment.

The contractor responsible for that "Men at Work" sign gets the job of building that stretch of highway by being the lowest responsible tenderer.

Not always does he have the ready money to buy all the materials, pay wages and build it out of his own resources. He goes to the bank and, having assets and a good reputation, he negotiates such advances as he may need.

He orders materials, sets men to work. As the job proceeds, engineers' certificates enable him to collect from those with whom he contracted, and the work goes on.

The highway finished, the bank is repaid. Such repayments enable the bank to supply credit to other responsible borrowers.

A manufacturer gets a large order, with an early time limit for delivery. With only a hundred men, his factory cannot turn out the articles within the time required. With more men he can do it—but he lacks sufficient cash.

Operating his factory, as a going concern, with a profitable order and having a reputation for integrity, he asks the bank to lend him what he needs to pay wages.

The bank makes him a loan. He takes on more men. They get wages. The goods are turned out, delivered and paid for. The manufacturer repays the bank with the agreed interest.

He has his profit and can spend some money developing new business to keep his men employed.

How does a bank make these advances—where does the money come from?

Banks, having branches throughout Canada, mobilize the surplus funds of millions of depositors, large and small, and, based upon them, make credit available throughout the country as may be required.

Millions of little sums represent the toil, production and lifetime savings of Canadians—your fellow-citizens.

Safeguarding these deposits is the bank's first care.

Deposits of \$1,000 or less—most of them much less—are owned by 3,770,000 out of Canada's 4,084,000 savings depositors. The total of all bank savings deposits in Canada is nearly \$1,584,000,000; the average savings deposit in a bank is only \$387.

Wisely safeguarded by Canada's chartered banks these deposits furnish credit that keeps "men at work" when used by Canadian business and industry—producing new realizable

wealth from Canada's great resources. The country and all its people benefit.

In the field of business deposits, out of an average of 660,000 "current" accounts, 596,000 amount to \$1,000 or less.

Savings deposits are, primarily, the basis on which banks can make loans.

Only the confidence of the people and their willingness to leave their money on deposit, enable a bank to lend money and—at small profit-margin to itself—serve the community.

We have mentioned the contractor and the manufacturer. The same process stimulates employment throughout the whole fabric of production, industry and commerce.

Loans to agriculture and for marketing agricultural products totalled in 1937, \$88,294,000—9.0 per cent. of all ordinary bank loans shown on the return to the Minister of Finance, October 31st, 1937.

Of this sum \$57,490,000 went to farmers, cattlemen and fruit raisers and \$30,804,000 to grain dealers, seed merchants and grain exporters.

Other bank loans went to municipalities and school districts; wholesalers, retailers, manufacturers of and dealers in lumber, pulp and other forest products; fishermen; fish packers and curers; public utilities including transportation companies; stockbrokers and bond dealers; provincial governments; mining men; churches, parishes; hospitals; and to charitable and religious institutions.

Canada's chartered banks defend and protect the safety of the funds of depositors—the millions of thrifty souls we have described, whose life-savings they entrust to their banks.

No Canadian depositor, even through the world-shaking events of recent years, has had to fear for the safety of a single dollar lodged with Canada's chartered banks.

The funds of depositors are their own—not a reservoir from which everybody may draw at will for any and every new financial experiment.

THE CHARTERED BANKS OF CANADA

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions, from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

WORLD HAPPENINGS BRIEFLY TOLD

W. J. Bulman, 68, founder of Bulman Brothers, Limited, lithographers and printers, died in Winnipeg General Hospital.

General Christian Smuts, for decades an outstanding figure in South Africa, has announced he will withdraw from politics at the end of the next parliament.

Experimental flights over the north Atlantic will be resumed this summer probably in July, Lieut.-Col. A. J. Muirhead announced in the British House of Commons.

The French Air Ministry announced that 100 aeroplanes had been ordered from United States manufacturers to fill the gap left by the failure of French industry to meet the ministry's urgent orders.

Prof. A. J. Newton, Rhodes Professor of Imperial History at London University, has been awarded the Royal Empire Society's gold medal this year for his "Cambridge History of the British Empire."

Appointment of Sir Gerald Campbell, for eight years British consul-general in New York, as high commissioner for the United Kingdom in Canada has been announced officially. Sir Gerald succeeds Sir Francis Ploud.

Frederick Perceval, 11th Earl of Egmont, Alberta's 24-year-old "Rancher Earl," left recently for England where he said he was to enrol his four-year-old son in one of the English public schools.

King Solomon's seaport on a northern reach of the Red sea, a flourishing city of trade and industry in biblical days of nearly 3,000 years ago, has been discovered and excavated by American archeologists.

A guide and interpreter who accompanied Theodore Waldeck's ill-fated expedition into the British Guiana jungle last winter, said the party had learned Paul Redfern, long-lost United States aviator, had crashed in Venezuela and was buried beside his plane.

A Valuable Discovery

Youth Claims His Artificial Radium More Economical And Safer

Dr. E. A. Smith, who said he was associated with the late Mme. Curie in her isolation of radium, declared 16-year-old Wallace L. Minto of Jersey City "has something" in his claim of a safer, more economical artificial radium.

Dr. Smith, who has laboratories at North Bergen and Newark, N.J., witnessed a demonstration of the youth's finding at the annual meeting of the eastern Electronic Research Association in New York. Minto, a high school student, showed, with the aid of a Geiger tube, what he described as the greater strength of his product as compared with the genuine radium.

"Young Minto definitely has made great strides," Dr. Smith said. "I predict a great future for him."

Minto said his artificial radium was less dangerous than the genuine article due to fewer alpha rays and more beta and gamma rays. It also is more economical, he said, because it was made from ore found near his home town, whereas genuine radium comes from the Canadian North and several other distant points.

Minto, who also claims to have found and named four new elements in the last two years—since he was 14 years old—said his artificial radium could be manufactured for about \$250 a gram in small quantities, more economically in increased output. Genuine radium sells for about \$25,000 a gram.

Too Much Open Work

Buffalo Shoe-Shiner Deplores Style Of Women's Footwear

Bert Brown, diminutive negro shoe-shiner in Buffalo city hall, has given up hope of ever getting any business from women. "Some years ago, when women really wore shoes, I used to get a few jobs," he explained, "but now there's so much open work in their shoes they have left me nothing to shine." Brown said he might pick up some business women if he carried "toe polish."

Eskimos like butter so much they can eat it by the pound.

Deals In Sunken Treasure

Chicago Man Will Attempt To Salvage Valuable Mexican Cargo

Capt. John Craig, who deals in sunken treasure and pirate booty on a strictly law-abiding basis, said he would descend to the ocean floor off the Virginia Capes next month in a quest which may yield a portion of the Mexican crown jewels and the rubies of the Empress Carlotta.

The treasure, which included 362 tons of silver bars, was lost when the liner Merida carrying refugees of the Mexican revolution, went down 55 miles off the Virginia coast.

Craig said the hulk, object of several previous treasure hunts, was lying upside down in the sand and was particularly hazardous to divers.

"We have to overcome part of that," he said, "by the new equipment we will carry, doing away with trailing airlines which might be fouled."

The new diving equipment was tested this spring, when Max Nohl left a coast guard cutter off Milwaukee and went down to a new world record of 420 feet in Lake Michigan.

The divers breathe a mixture of helium and oxygen fed from tanks carried on their backs, eliminating the hydrogen mixture which left divers susceptible to the "bends" and to the danger of becoming stupefied if they remained down too long.

Francisco Madero had seized control from the dictator, Diaz, and forbidden exportation of wealth. The Merida almost had reached its haven when it was rammed by the Admiral Farragut looming suddenly out of the dark. The Merida went down and with it its treasure.

Gardening

More tender vegetables are beans, tomato plants, squash, cucumbers and melons. They will not start to grow until the weather and soil really become warm. In order to get a long and steady supply of green beans, make at least three plantings at intervals of ten days, and use several varieties. To do the same thing with tomatoes one may use a few well started plants for the first crop, and hurry these along with fertilizer and possibly mulch paper. All garden tomatoes should be staked.

These warm weather vegetables prefer rich open soil and any members of the melon family, that is squash, cucumber, citron, etc., take special delight in hot, sandy soil, though it must be made rich. Along with the vegetables mentioned, one may set out egg plants, well started peppers and the first planting of celery. The latter must have very rich soil and water during the dry weather. There is still plenty of time to make second and third sowings of nearly all standard vegetables such as beets, carrots, corn, etc.

Gardeners will find the judicious use of commercial fertilizer a very valuable aid in hastening growth. For lawns and flower gardens, too, where the use of ordinary manure might be offensive, odourless chemical fertilizer is to be preferred. But this sort of thing must be used carefully. If it is allowed to touch the foliage it is apt to burn. With vegetables, the fertilizer is raked in close along the rows, without actually touching the tender roots. Two or three applications during the growing season will push all vegetables along quickly.

General garden insect enemies are divided into two groups—those that eat holes in the foliage and those that suck out the juices. For the first-named, poison is usually applied, while the suckers are attacked with a burning spray which penetrates. Often when both are present a combination of poison and something that burns, such as lime sulphur and arsenate, gives the best results. The damage from the biting insects is usually quite apparent, but the presence of the other kind is only shown at first by a wilting or withering of the foliage. For sucking pests, chief of which are the aphids or plant lice, spray with whale oil soap, a quarter pound of soap to a gallon and a half of water; nicotine sulphate or 'Black Leaf 40', or any other repellent secured from a reliable seed store. When fungus attacks the plants, the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in warm, murky weather. Spraying with Bordeaux Mixture or dusting with specially finely ground sulphur is advised.

The Canvas Of Life

We are not writing in the sand. The tide does not wash it out. We are not painting our pictures on canvas and with a brush, so that we can erase the error of yesterday, or overlay it with another color to-day. We are writing our lives with a chisel on the marble, and every time we strike a blow we leave a mark that is indelible.

TAILORING FOR LARGER WOMEN

By Anne Adams

Here's a summer design to make larger women want to "live" in shirt-waist styles! Its seams are slimming and easily put together. Its graceful curved yoke, jaunty pockets and neat loose sleeves have a way of taking years off one's age, while its kick pleat allows for a healthy step. The pointed collar may be preferred in a shade different from the rest of the dress to match the pockets, which may be left off if desired. A small tie silk print—or one of the pretty new cottons in a neat summery design—will show up to special advantage in this Anne Adams triumph. Pattern 4810 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4 yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Northern Mining Area

Report Describes Geology Of South Reindeer Area In Saskatchewan

The general and economic geology of the South Reindeer Lake area in northern Saskatchewan are described in a preliminary report (Paper 38-15) issued by the Geological Survey Division, Department of Mines and Resources, Ottawa, and based on field investigation by F. J. Alcock. The 5,000-square mile area adjoins the Manitoba border, and is underlain by different groups of Precambrian rocks.

The most promising part of the area, and the one which has most attracted the attention of prospectors is that surrounding Waddy and Nistossini Lakes, near the western border. Much staking was done in this section in 1929 by Nipissing Mines, Limited, Ventures Limited, and Dominion Explorers Limited, and others, and during 1937 development work was carried out on several claims held by Churchill Minerals, Limited. The main mineral showings in the region lie near a small stock, which may be the source of the surrounding mineral deposits. It remains to be proved, however, whether any of the deposits so far developed are of commercial value.

The report (Paper 38-15) includes also information on means of access to the area, its topography, and travel routes, and is accompanied by two large-scale preliminary geological maps. Copies may be obtained from the Director, Mines and Geology Branch, Department of Mines and Resources, Ottawa.

Before leaving a house he had ransacked, a Toronto burglar is reported to have feasted on a jar of home-made preserves. Those chaps have tools which will open anything!

Mrs. M. Holt, who has died in Manchester, England, attended the same Sunday School for 78 years.

British Empire Exhibition

Gift Of Canadian Maple Sugar Is Presented To H.M. The Queen

When Their Majesties King George VI. and Queen Elizabeth visited the Canadian Pavilion after formally opening the British Empire Exhibition at Glasgow on May 3, they were particularly attracted by the display of maple sugar and maple syrup in the section of the Dominion Department of Agriculture and Her Majesty graciously accepted a gift of maple sugar.

The maple sugar and maple syrup on display in the Department of Agriculture section was supplied by four well known producers in the Province of Quebec, from which province last year about 80 per cent. of the total Canadian output of maple sugar and maple syrup was produced in 1937. Part of the display is in half pound pieces in the shape of maple leaves. This display is decorated with thousands of coloured maple leaves, which were especially selected in the woods last fall.

F. C. Nunnick, of Ottawa, Director of Publicity and Extension, Dominion Department of Agriculture, is in charge of the Department's section in the Canadian Pavilion.

What The League Needs

Is Alliance Of Nations In Defence Of International Law

The real answer is the world will never be sure of peace and never enjoy justice until nations do ally themselves in defence of international law, treating an unprovoked attack upon one as an attack upon all. In that sense the League was never meant to be anything else except an alliance. Until it is an alliance of that kind, it will remain impotent, a fact which nations will recognize by piling up their own arms. Whether alliances are bad or good depends simply upon their purpose, on the principles of their operation. If the purpose of an alliance is merely to strengthen the power of a group of nations to get their own way, to run the world as they like it, to judge all their own causes, it is power-politics, and it will breed war.—London Daily Herald.

Lloyd's Make New Rule

Will Not Reimburse Owners For Gems Lost In Spain

Precious stones are again in demand in Europe and prices are advancing. Paris reports important buying by people who want to guard against falls in the value of the French franc. London has received reports that Americans abroad are purchasing worth-while stones as investments, paying up to \$50,000 each for solitaires. Lloyd's has had a large demand for diamond insurance recently in spite of the organization's new rule that owners can no longer insure against war risks. This is expected to cause uneasiness among gem owners in Spain or Shanghai for Lloyd's will not reimburse for stones lost during the fighting there.

British Tolerance

A Noted Scot Pays A Tribute To England

A noted Scot paid a tribute to England after he received the freedom of Edinburgh city. Lord Macmillan recalled one of the occasions on which he sat as a member of "what is incontestably the greatest court in the world—the judicial committee of the Privy Council". In that court on that day there was not a single member of the English Bar. It was presided over by Lord Duncannon and Lord Thankerton was Lord Macmillan's colleague. "Three Scottish advocates to the Empire in that tolerant country of England", Lord Macmillan commented.

A New Art Treasure

Drop In River Rhone Level Revealed Bust Of Venus

Dry weather and an unusual drop in the level of the River Rhone have given France a new art treasure. The water at Vienne, near Lyons, dropped to such a low level that it exposed a hitherto-unsuspected foundation of an old Roman bridge, then large fragments of white marble and a well-preserved bust of Venus. Classical experts expressed belief it was a genuine piece of art of the Gallo-Roman period.

Health

LEAGUE OF CANADA
presents
TOPICS OF VITAL INTEREST

by **DR. J. W. S. McCULLOUGH**

ARTICLE NO. 87

Carcinogenic Agents

In 1915, two Japanese workers, Yamagiwa and Itchikawa, succeeded in producing cancer in the skin of mice by painting the skin with tar. In 1930 British investigators announced that they had produced experimental cancer by means of pure hydrocarbons. Hydrocarbons are compounds of carbon and hydrogen and the particular one depends on the relative proportions of contained carbon and hydrogen. Benzene is a hydrocarbon containing equal parts of carbon and hydrogen. An example of a fatty hydrocarbon is paraffin.

The investigations carried on in the effort to produce carcinogenic agents read like a romance. Much of this work was done at the Cancer Hospital in Fulham Road, London, by Kennaway, Cook, Hieger, Hewett and others.

The first cancer-producing agent was called 1:2:3:6—dibenzanthracene, an aromatic hydrocarbon, which when injected into the body, will cause cancer. Re-arrangement of the molecules in this formidably named substance, gave other carcinogenic agents.

More recently these investigators have produced from coal-tar, several hydrocarbons active in producing cancer in the skin of mice. It has been found that certain lubricating oils, notably those found in the north of England and on the Continent of Europe, will cause cancer of the skin. Moreover it has been found feasible to remove the cancer-producing agent from these oils and thus to make them safe.

The discoveries just referred to have changed the entire attitude to the matter of chronic irritation in regard to cancer. It is now believed that the irritant simply prepares the way for the action of the contained special cancer-exciting substance. Bit by bit, research workers are uncovering the secrets of malignant disease. The best part of this work is, that the scientific research worker does not try to exploit his discovery for his own benefit. He gives it freely for the benefit of his fellow-men.

Next article—A Word to Women About Cancer.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to—The Health League of Canada, 105 Bond St., Toronto, Ont.

Purchasers Get Break

British Firms Selling On Credit Cannot Repossess Without Court Order

Five million British families buying furniture, automobiles, radios and what-not on the "never never" plan had reason to rejoice when the House of Commons passed the "hire purchase" (installment payment) bill.

Ellen C. Wilkinson, Laborite who sponsored the bill, dashed from Commons to a cocktail party to celebrate her victory.

Installment salesmen were not so jubilant. The bill provides that they may recover goods from defaulters only under court order and that the seller must specify both cash and installment prices for goods.

The bill was intended to curb firms which seize goods even if only the final payment is overdue.

Few Would Do It

Someone suggests that when we begin pining for the "good old days" we should run the automobile into the lake, throw the radio into the garbage can, tear the telephone off the wall and throw the electric light switch out of the window. Yes, says the Lethbridge Herald, and take the airplane down out of the sky while we hitch up the ox team.

For Your Preserving

Use It This Year

WHAT HO!

— By —

RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XI.—Continued

"You gave me a nastier one, I'm sure," said Ernest, politely. "Doubt it. Drink?"

"No, thanks."

"You know, Bingley," said Duff-Hooper, "in many ways you're not a bad sort at all. Why, you might almost be an Englishman."

"Thanks," said Ernest.

The captain raised his glass.

"I drink," he said, "to the confusion of all ghosts, phantoms, spooks, and haunts in general, and to the spirit of Sir Rufus in particular. If I ever do meet him, I shall jolly well tweak his nose and chase him back across the Styx."

"Amen," said Ernest. "And if I meet him—"

He stopped, for the captain's glass had fallen from his limp hand, and the captain's eyes were starting from their sockets. Ernest looked where the captain was looking. Then his eyes protruded, too. Through the yellow-gray light of the Great Hall a figure was coming toward them, and it was a headless ghost.

Ernest Bingley and Captain Esme Duff-Hooper stood their ground. Or at least they did not run away. It was not courage, however, which soldered them to the sofa. It was total paralysis. If they could have moved a muscle, it would have availed them little, for their backs were to the solid wall of the castle, and between them and any egress was the sable figure without a head.

Slowly it came toward them. Seeing them, it paused and stood regarding them as if it were trying to decide which to dispatch first.

After a long and breathless minute it said,

"I say, what's this—a convention?"

The voice of the third ghost was the voice of the current Earl of Bingley.

No sound came from the sofa save the rattling of teeth.

"Fine weather for haunting," observed the earl.

Ernest began to laugh a wild, hysterical laugh. Duff-Hooper poured himself another drink.

"I'm getting to be rather good at this ghost business," said the earl. "I rather think that the Wyncoops have already begun to pack."

"So you hit on my idea, too," said Ernest.

"Your idea?" returned the earl, nettled. "I like that! Your idea, indeed? Why, my dear old banshee, I was doing some amateur haunting around here when you were still at nurse. I've worn out two heads, frightening unwelcome guests. I say, help me out of this clammy dingus. Haunting always makes me thirsty for a Scotch and splash."

Ernest came down to breakfast a

little late. Otis G. and Armina Wyncoop, and Mrs. Clara-Martha Phelps were already at table. Their appetites did not seem to be very hearty. They were dressed for travelling.

"I'm sorry we must leave in such a hurry, Ernest," Armina said.

"Surely you're not going so soon?" said Ernest.

"It's for the best," said Mrs. Wyncoop. "Poor little Mervin is on the brink of a nervous break-down. After his horrible experience last night he refuses to stay here another day."

"What experience?" asked Ernest.

"He saw a ghost."

"Moonshine, my dear lady," said the earl, blandly. "The imaginative little fellow was dreaming. Had too many tarts."

"I had no tarts," said Armina Wyncoop, "and I saw the ghost."

"Oh, come, come, now," said the earl. "After those yarns I spun at dinner you were in a mood for ghosts. What you saw was probably Cook in her night-gown."

"It was a man and it had no head."

"May I recommend my medical man in London?" said the earl. "He's tip-top on nerves and so on. Beddingdon always goes to him when he has the yipping whim-whams. Suppose you just buzz in and consult Sir Casimir Hitchcock, in Harley street, and he'll give you some pills."

"That's not a bad hunch, Mina," said Otis G. Wyncoop. "Guess I need a tonic or something myself. Seeing that ghost has got me down."

"So veddy sorry I slept through all the excitement," said Mrs. Phelps. "You must pay us another visit soon, my dear Mrs. Phelps," said the earl. "I feel sure I can arrange a personal interview with the ghost for you."

"How veddy kind of you," said Mrs. Phelps.

"What happened to Mervin?" Ernest asked.

"He's waiting in the car," said Mrs. Wyncoop. "He had his breakfast there. I'm afraid the poor little fellow does not like castles much."

"That's too bad," said Ernest.

"And please don't go out to say good-bye to him," said Mrs. Wyncoop. "We'll just slip away quietly, if you don't mind. His sensitive system has had a shock. He can stand no more excitement for a while."

"When he's cured will you come back?" said Ernest.

"Thank you, but I'm afraid not," said Mrs. Wyncoop. "We'll spend a few days in London and then go to Europe. Mervin wishes to visit the Tower again and brush up on his history. Otis has a business appointment with Sir Peter Tyler. I must get a perm. After that, we'll cross the channel and just gad about."

"I'll be staying in London," said Mrs. Phelps. "At the Hyde Park Hotel. I simply must go to work on my Chaucerian research, you know."

The thanks of the Wyncoops were expressed, and acknowledged, and good-byes said.

The rented limousine glided away from the castle door. A subdued and wordless Mervin huddled in the back seat, flanked by his bulky progenitors.

The earl stood waving his handkerchief at the disappearing car. Mrs. Phelps waved back. The car slipped round a bend. The Wyncoops had gone.

"Oh, boy, oh, boy, did I do a good job of haunting!" said the earl.

"You certainly did, sir," laughed Ernest.

They started back into the castle. No cloud was on Ernest's immediate horizon now. Lady Rosa was dressing to go for a walk with him.

"What's this?" exclaimed the earl. "Sink me, if they're not coming back!"

Ernest looked down the drive. A limousine was coming toward them.

"It can't be the Wyncoops," said Ernest. "Their car was old and black. This one is new and purple."

"Now who can I know who can afford a new car?" mused the earl.

The sumptuous equipage stopped, and a figure in an eye-stubbing checkered ulster surged out of it, and tramped toward them.

"Angels and ministers of grace, defend us!" exclaimed the earl. "That looks like Punder."

Punder it was.

CHAPTER XII.

"Hah!" said Punder. "Here I am."

"Howjerdo?" said the earl.

"Said I'd be back, didn't I?"

"We've been counting the days," said the earl. "You remember my

RHEUMATIC PAINS are TORTURE!

Don't let rheumatic pains make your life miserable. Poisonous acids from faulty kidney action are probably the cause. Gin Pills drive out these poisons by toning up the kidneys so they can filter the blood properly. "Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

kinsman, the Bingley from America, don't you?"

"Hah! I've reason to," said Punder, and gave Ernest a look like a bite.

"May I ask if you are here on business or pleasure, Mr. Punder?" said the earl.

"Both."

"Won't you come in?"

It was a needless invitation, for Punder, unbidden, had already pushed his way across the castle's threshold.

In the library Mr. Punder took the most comfortable seat, and lit a corollary cigar.

"Do you mind if Mr. Bingley stays?" asked the earl.

"I don't care who is here when I speak my piece," said Punder. "Invite in the whole country, if you want to."

"That's liberal of you, Mr. Punder," said the earl. "Your offer is declined with thanks. And now, Mr. Punder, what's on your mind?"

"I've come to take the castle," Punder said.

"I'll have it wrapped up immediately."

"Make a joke of it, if you like; but it's no joke as you'll soon find. Ask your solicitor."

"What will Mr. MacKintock say?"

"He'll tell you I got the law on my side," stated Punder. "Those were demand notes you signed."

"Were they?"

Mr. Punder nodded.

"I seem to know more about your affairs than you do," he said.

"Shouldn't wonder," said the earl. "I don't seem to know how those notes concern you, Mr. Punder."

"Because they're mine, now," Punder said. "I bought 'em."

"The interest has been paid. That I do know," said the earl.

"Yes, back interest. But I did not come to collect interest. I want the principal. I'll trouble you for twenty thousand pounds, m'lud."

"No trouble at all, if I had it," said the earl. "But I haven't."

"I know that, too," said Punder.

"I'm in an excessive awkward situation, aren't I?"

"Well, that's one thing you know," said Punder.

"I wonder if you also know what

I think of people like you," said the earl.

"I do," said Punder, "and I don't care a button what you think. And that goes for you too," he added, darting a pickled glower at Ernest.

"What do you propose to do, Mr. Punder?" asked the earl. There was nothing care-free or casual about his manner now.

"You got just one guess."

"I'm no good at guessing games," said the earl. "Say your say and get it over with."

"One week from date I move in and you move out. Is that plain English?"

"I never heard plainer," said the earl. "But, surely Mr. Punder, you don't intend really to shovel a man out of his home on such short notice."

"Hah! Don't I? Gave you fair warning, didn't I? Said I wanted this place and meant to have it. Nothing stops Punder."

"But, Mr. Punder, why must you have Bingley? There are heaps of castles knocking about you could pick up for a ditty. Some nearly as old and many far bigger and in better shape than this one. Take the Duke of Beddingdon's seat in Shropshire. He's anxious to sell it—"

(To Be Continued)

Repetition Of History

Haile Selassie Stole Ethiopian Throne By Murder And Intrigue

Among the many things I am not going to sit up nights and worry about, states Malcolm W. Bingay, in the Detroit Free Press, is the case of Haile Selassie—deposed ruler of Ethiopia—deposed by Mussolini. He's been over at Geneva insisting the nations of the world restore him to his throne as "King of Kings."

That Italy stole that country need not be denied. That, however, is the way all nations get colonies, including the United States when we helped ourselves to Texas, and, later, land for the Panama Canal.

But why—in the realistic world recently created by Premier Chamberlain—anybody should feel sorry for Haile is more than I know. He himself by murder and intrigue stole the throne of Ethiopia, and made the real heir a life prisoner. He hasn't any more moral claim to Ethiopia than has Mussolini.

Customer: "To what do you own your extraordinary success as a house-to-house salesman?"

Salesman: "To the first five words I utter when a woman opens the door—'Miss, is your mother in?'"

"Are you going to quit driving this year from the back seat?" indignantly asked Mr. Chuggins.

"Yes," replied his wife. "I'm going to sit in front with you, so that you can hear me better."

Fair Pianist: "That was 'The Death of Nelson.'"

Victim: "I'm not surprised."

KING DISCUSSES PLANES WITH RECORD-BREAKING PILOT

King George recently flew to four different Royal Air Force Stations in one day on a tour of inspection and covered 200 miles. In the above picture His Majesty is being shown the intricate workings of the Hawker "Hurricane" fighter by Squadron Leader J. W. Gillan. It will be remembered that Squadron Leader Gillan recently astonished the world by flying one of these planes from Edinburgh to London, 385 miles, at an average speed of 408.75 miles an hour, or nearly seven miles a minute.

New Dental Method

Demonstrate How Lower Plates Can Be Kept In Place

Hailed as the outstanding clinical development at the convention, a simplified method of "harnessing" lower dental plates was shown by a Toronto dentist at the Ontario Dental Association meeting in Toronto.

Dr. Irvine H. Ante, member of the Dentistry Faculty at University of Toronto, demonstrated to nearly 300 delegates the method he had developed for great comfort and increased stability of lower plates. He described his discovery as a simplification of a method developed by two New Orleans dentists, Drs. Fournet and Tuller.

The Toronto dentist, using a living model, explained the method discovered by the New Orleans men "was really applicable to specialists only" and took from two to three hours. The revised method could be used by the general practitioner and took only 15 to 20 minutes.

Dr. Ante claimed that at least one-third of persons who used lower dental plates, until discovery of the Fournet-Tuller method, were caused aggravation because lower jaw muscles displaced the plates. Muscle movements under the Ante method were used to hold the denture firmly.

Have To Import Water

Bermuda Short Of Supply Owing To Lack Of Rain

Bermuda, according to reports from Hamilton, is suffering from a drought and is having to buy water from New York. The natives of Bermuda, like those on other coral islands, depend for their water reserves upon rain, and when rain fails so does the supply of fresh water.

On the Virgin Islands every roof is equipped with its own cistern for draining off and conserving rain water, and in the hills are built triangular rainsheds designed to catch the water as it falls. Bermuda's arrangements are generally of the same kind. And they work very well so long as rainfall is reasonably consistent. But let there be a dry spell and one has to import water as if it were vintage wine.

Gentleman From Hawaii

Wears Flowing Robes Of Silk With Diamond Brooches

Wherever he went, from the moment he stepped off the boat that brought him from his Honolulu home, to his frequent excursions through the lobby of the Saint Francis, where he was stopping, all eyes turned in astonishment upon Ernest Parker, for this more than interesting gentleman does not elect to wear the clothes of Bond Street. Instead, he dons flowing robes of the choicest silks and embroideries, which are set off by enormous diamond brooches.

Of a tall and commanding figure, it was little wonder that this Hawaiian scion caused all conversation to cease abruptly whenever and wherever he appeared.—San Francisco Argonaut.

Automatic traffic signals have one advantage over the old-fashioned cop-on-the-corner. They go right on functioning no matter how many swell blondes walk by.

Searle Precipitation Report No. 2

Taking into account the precipitation that occurred last autumn during the months of August, September and October, and the rains that have fallen this year from April 1st to June 4th inclusive, and weighting for wheat acreage, the moisture condition of Alberta, on June 4th, was 98% of the normal as compared with 100% for the previous week and 104% for the week before that.

For Saskatchewan, on June 4th, the condition was 84% as compared with 95% for the previous week and 86% for the week before that.

For Manitoba on June 4th, the condition was 86% as compared with 95% for the previous week and 91% for the week before that.

Taking the three prairie provinces as a unit, the weighted average on June 4th was 89% of the normal, as compared with 96 per cent at the same time last week, 92 per cent for the week before that and 72 on June 4th last year.

The present moisture deficiency as compared with normal, revealed by these figures, is not serious enough at this time to harm the growth of the wheat plant. It really means that the moisture reserves that the plant will begin to call upon about June are somewhat less than normal. However, the existing deficiency can easily be made up in the next few weeks provided generous rains occur.

Boys and men—buy your running shoes from T. E. Scott. We have them from 90c per pair, up.

After a short devotional period led by the president, Mrs. Boorman, a very interesting and inspiring talk was given by Miss Maggie Finlay, who for a number of years was engaged in missionary work in Nigeria, West Africa.

Have you tried a pair of Scott's \$2.50 work shoes? If not, do so—they're extra good value!

N. Nowak has started operations toward the erection of his new shop on Main St. The new building will be 26x30 and of brick construction. W. T. Pitt has the building contract. During building operations the shoe repair and harness business will be carried on in Frank Kaufman's store.

LOCAL & GENERAL

The Evangelical Ladies' Aid will hold a Strawberry Tea soon. Special announcement next week.—Be sure to look for it!

Mountain View Notes

The news of the sudden death of Mrs. J. Hill came as a shock to many in the neighbourhood. Mrs. Hill was a great worker in the local W.I. and deepest sympathy is felt for the members of the family. Mrs. Ed. Blain, Mr. and Mrs. Thomas Finley, Mrs. Ed. Barnes attended the funeral held in Calgary on Friday.

Local schools around to be vacant are Mona, Neapolis and Gore Neapolis, we understand, have hired their new teacher. Mr. Gulliver plans to attend University this fall. Miss Goldie leaves to be married and Mr. Shantz we understand, is to farm.

The monthly meeting of the W.I. will be held at the home of Mrs. H. Roberts instead of the home of Mrs. Bennie St. Clair as planned.

We are sorry to hear Mrs. J. Steele is again in the hospital and we wish her a speedy recovery.

The recent frost played havoc with many gardens. Marrow plants and beans suffered the worst

Evangelical Church Notes.

Rev. W. Krueger of Regina will conduct both the morning and evening service next Sunday, June 19.

Items of Interest

If roads from the international border through Alberta to Canada's national parks were dustless, \$20,000,000 additional tourist business would be realized each year. So E. T. Scoven, superintendent of the Glacier National Park in Montana, who passed through Calgary last week, told J. W. Bawden, secretary of the Alberta Motor Association. Tourists would stand for rough roads—but they would not put up with dusty roads, according to Mr. Scoven.
